

Semi-Automatic Filling Machine C-Easy Flow/Scale Model Easy Flow/Scale Model

Features

Semi-automatic flowmeter filling machine (*Flow*) or by Scale (*Scale*).

C-Easy Model - Machine designed for filling products with a tendency to foam, eg, detergents. The mobile filling column follows the filling level.

Easy Model - Machine for filling non-foaming products. The filling valve has enough movement to prevent splashing, entering the package slightly.

Parameterization is done in a simple way through a touch console, where you can adjust filling speeds and dosing capacity in liters or kg. The operator has 8 programs available to memorize 8 product families.

According to the fluid to be processed, we have a range of flowmeters capable of satisfying customer needs, namely turbine, electromagnetic and mass flowmeters. In the case of dosing by weight, the machine includes a metrological certificate.

Stainless steel chassis. The machine does not include a pump, which will be defined according to the fluid to be processed.

Technical Specifications

Pneumatic components	SMC
Automation components	Rockwell Automation / Ifm
Dosing range	According to the range to be dosed
Performance	200 packages of 5 kg or L per hour
Electric current	220 V
Compressed air	6-8 bar
Dimensions (Width x Height x Depth)	1150 x 1890 x 870 mm
Weight	70 kg
